

Switch on

Switch on the organ with the on/off piston at the right, next to the manuals.
 Wait several seconds. Starting the control functions and the settings will take some time.
 The lamps of the on/off and 0 pistons light up and the settings appear on the display.

Overview of controls

A: Pedal board and couplers	N: - and + pistons
B: Great stops, tremulant and coupler	O: Transposer
C: Main group intonations	P: Chorus, Manual Bass Cantus Firmus
D: Subgroup intonations	Q: Reeds Off accessory
E: Midi stops per manual	R: 0/reset piston
F: Swell stops and tremulant	S: Pre-programmed memory locations
G: Manual Swell	T: Sequence -, Sequence +
H: Manual Great	U: Capture memory locations
I: On/off	V: SET/Enter
J: Display	W: Volume control organ
K: 0 and reset piston	X: Volume control acoustics
L: MENU	Y: Super Solo's
M: General Crescendo	Z: All swell to swell

Accessories:

Chorus (CH): Is a function for lightly detuning the organ stops to give it a broader and livelier sound. Use the CH piston to activate the Chorus.

Reeds Off (RO): This is a function to switch off all reeds simultaneously. As long as this piston is pressed, no reeds can be activated. When this function is switched off, the reeds that were on are activated again. Use the RO piston to activate the Reeds Off function.

General Crescendo pedal (CR): This is a function for switching the General Crescendo pedal on and off.

Change the registration:

The 0-piston cancels registration in two ways:

- A short press on the 0-piston: Only the last change is cancelled.
- A long press on the 0-piston: All registrations are cancelled.

Intonations:

The intonations are divided into a main group and a subgroup.
 The main group consist of:

- Romantic (ROM.)**
- Symphonic (SYM.)**
- Baroque (BAR.)**
- Historic (HIS.)**

The subgroup consist of:

- Classic**
- Solo (SOLO)**
- Hymn (HYMN.)**

Select a main group by pressing the ROM, SYM, BAR or HIS piston.
 Then select a subgroup by pressing the SOLO or HYMN piston.
 If not subgroup is selected, Classic is selected automatically.

Pre-programmed memory locations:

Pre-programmed memory locations are available by operating pistons PP to T.
 These six memory locations have factory settings (presets) appropriate for the quiet pianissimo to the loud tutti.

Calling up a pre-programmed memory location:

Press a pre-programmed memory location (PP-T). The active stops light up.

Capture memory:

Through use of the capture memory, a registration can be made active with just one piston. The capture memory consists of eight levels. Each level has eight memory locations. These levels can be seen on the display (Mem:...). The 256 capture memory locations are not pre-programmed and can be programmed by the musician.

Programming a capture memory location:

The current setting of the capture memory location will be lost.

- Select the desired stops.
- Use the - and + pistons to select a level (1-32) on the display.
- Press the SET piston. Hold in the piston.
- Press the desired memory location (1-8).
- Release the SET piston.

Calling up a capture memory location:

- Use the - and + pistons to select the desired level (1-32) on the display.
- Press the desired memory location (1-8). The active stops light up.

The - and + pistons allow you to select a lower or higher (respectively) memory location in steps of one. The lit-up capture piston and the display indicate which memory location has been selected.

Reverb:

- Use the ROM, SYM, BAR, HIS (styles), SOLO and TRIO (intonation) pistons to activate the style and intonation the reverberation of which must be changed.
- Press the MENU piston.
- Use the - and + pistons to select the Reverb Settings function on the display.
- Press the SET piston. The display shows three possibilities:
 - Reverb Program
 - Reverb Length
 - Reverb 3D Surround
- Use the - and + pistons to select Reverb Program.
- Press the SET piston. On the display appears a list of twelve Reverbs which you can choose from.
- Use the - and + pistons to select the desired reverb.
- Press the SET piston. The chosen reverb is now stored in memory.
- Use the - and + pistons to select Reverb Length.
- Press the SET piston.
- Use the - and + pistons to select the desired length of the reverb (1-20).
- Press the SET piston. The chosen reverb length is now stored in memory.
- Use the - and + pistons to select Reverb 3D Surround.

- Press the SET piston. The selected 3D Surround setting is stored in the memory.
- Press the MENU piston twice to exit the Easy Menu.

External connections:

The external connections are on the left under the console

MIDI IN: This is an input for receiving MIDI codes from other devices.

MIDI MOD.: This is a programmable MIDI output for connecting a module or expander, for example.

MIDI SEQ.: This is a non-programmable MIDI output for connecting a sequencer or PC (with the optional Johannus Intonat program), for example.

AUX IN: This is a (stereo) input for playing the sound of an external device through the amplifiers of the organ. For example, an expander connected to the organ through the MIDI MOD. can be played through the instrument's loudspeakers.

AUX OUT: This is an output for connecting an external (stereo) amplifier.

PHONES: This connection for a (stereo) headphone is suited for a headphone with an impedance of 30 Ω or more (see headphone specifications).

Volume controls:

Organ: You can adjust the volume of the organ with the ORGAN volume control.

Expression pedals adjust the volume of the Great/Pedal, the Swell

Acoustics: The acoustics volume can be adjusted smoothly with the ACOUSTICS volume control.
